

## Online Safety Newsletter

May 2026

### FreezeNova (Unblocked games)

FreezeNova unblocked is a website that is free to access and contains a wide variety of games, including shooting, multiplayer and racing games. This site may bypass usual filters, making it easier for your child to access games that you may not want them to play. As there are a variety of games, not all games may be suitable for your child.

There is also FreezeNova Chat, allowing users to chat to their friends and meet new ones. Clearly there are concerns with any online chat facility as there is the potential to view inappropriate content, risk of bullying as well as grooming.

I could not locate any age ratings on this site and there are constant adverts. Childnet have a webpage providing advice on gaming and chat features here:

<https://www.childnet.com/help-and-advice/gaming/>

### PEGI is expanding their age ratings

From June, PEGI is adding new categories. "Newly submitted games will be classified with a broader set of criteria that will focus on content and functionality, such as purchases of in-game content, paid random items, communication features, and features that incentivise players to continue playing." Find out more here:

<https://pegi.info/news/pegi-expands-age-rating-criteria-interactive-risk-categories>

## Group Chats

Is your child part of any group chats? This could be on social media, for example on WhatsApp or within games such as Fortnite. If so, it is important that you are aware of the potential risks, which include:

- **Inappropriate content** – there is often a lack of moderation within chat facilities so users could be exposed to content/language that is not suitable for their age.
- **Bullying** – there are many instances where inappropriate/hurtful comments are shared within groups, this could take the form of name calling or body shaming. Bullying can also be in the form of excluding others from the group. These issues often overflow into 'real life'.
- **Strangers** – your child could be added to groups with people they do not know or even with someone that they have previously blocked.
- **Conversations can be shared/screen shot** – make sure your child is aware that anything they share within a group can be shared with others.
- **Sharing personal information** – remind your child to be aware of the information they share with others, including images and location.

### How can I help make group chats safer?

- Check the recommended age rating and adhere to them.
- Set up age-appropriate parental controls, suitable privacy settings and set screen time limits.
- On WhatsApp you can do a privacy check, by going to settings, privacy and privacy checkup.
- Show your child how to use any reporting and blocking tools.

### What else can I do?

- It is **crucial** to have regular conversations with your child about the risks outlined above and about what they are doing online.
- Talk about who they are chatting with, encourage them to think carefully about what they send and how it could be perceived by others. **Talk about positivity and not saying anything hurtful. Ask them to think about whether they would say what they are messaging, face to face.**
- Devices should be used in family rooms so you can monitor what they are doing and who they are interacting with.
- Finally, make sure to model good digital behaviour yourself, as children often learn by observing the adults around them.

# What Parents & Educators Need to Know about AI-ENABLED SCAMS

## WHAT ARE THE RISKS?

Artificial intelligence (AI) is quickly becoming a widely used tool, with lots of positive applications being discussed and developed. Sadly, however, as with most technology tools, there are those who will seek to use it for malicious and dishonest practices, with children and other vulnerable groups particularly at risk.

### PHISHING EMAILS: BETTER & QUICKER

Phishing scams – emails designed to trick people into handing over login details or money – are not new, and do not rely on AI; however, AI has made them far more dangerous. Criminals can now generate highly convincing emails at speed, mimicking an organisation's tone, branding and language with ease. This makes phishing attempts harder to spot, especially for young people who may not yet know what to look out for.

### ONLINE MARKETPLACE FRAUD

Online marketplaces are now a common way to buy and sell everything, from second-hand clothes to cars. Criminals are exploiting this by using AI to enhance or completely fake product photos and videos, and pressure buyers into paying deposits or full amounts upfront. These tactics are becoming more advanced, making it vital to pause, check, and verify the sale before parting with any money.

### VOICE IMPERSONATION

AI can now realistically impersonate a person's voice when given a small sample of someone's speech patterns. This is especially concerning where voice has been enabled as an alternative to password-based logins. One such example was the use of AI deepfake audio as part of a fake kidnapping scam: the criminals used an AI voice clone of a 15-year-old to convince her parents she had been kidnapped and elicit a ransom.

### EMPLOYMENT SCAMS

Using AI, criminals can create fake online profiles that seem completely real. These synthetic identities can chat with young people about fake job offers, asking for money to secure a visa or paperwork. In 2025, The Guardian reported a scam targeting young people with promises of quick cash, posing as TikTok staff.

### INFLUENCER & INVESTMENT SCAMS

AI tools now make it easy to manipulate video and audio, with technology available that can generate entirely fake content using the likeness of celebrities or influencers. Criminals are using this to create convincing videos of well-known figures promoting fake products or services, which young people can be particularly susceptible to. Cryptocurrency scams are a common tactic, luring people into investing in schemes that do not exist. Once payment is made, the criminal simply disappears with the money.

### ROMANCE SCAMS & SEXTORTION

AI chat bots can now mimic real conversations, often accompanied with realistic fake photos and videos, which makes it easier for criminals to build trust with young people – among other things, this can lead to fraud or sextortion. In 2024, the NCA's CEOP Safety Centre received 380 reports of sextortion. Alarmingly, in the first five months alone, police received an average of 117 monthly reports involving under-18s, showing how serious and targeted this threat has become.

## Advice for Parents & Educators

### THINK CRITICALLY

The key to addressing the increasing growth of AI-enabled scams is to think critically and show caution. Inform children that if something is too good to be true, then it probably is. Encourage them to stop and carefully consider what they are seeing and reading before taking any action. For example, if a social media post expresses urgency, proceed with caution; if content seems unusual, even from a known person, it may be that their account has been hacked.

### SEEK TO VERIFY

Criminals may breach an influencer's account or spread misinformation and fake content; however, their approach will generally be limited to a single account, site or service. Where possible, show children how to verify information to check its legitimacy before proceeding. Small actions, such as phoning the person who is the subject of a suspicious email, or checking content via an individual or company website or social media sites can make the difference. The greater the risk, the more effort we should expend to confirm whether the information presented is true or false.

### USE TRUSTWORTHY SITES AND SERVICES

Online marketplaces are useful when buying and selling items; however, where possible, encourage children to use reputable companies and their online shopping sites. These companies are likely to have more sophisticated cyber-security safeguards in place, underpinned by consumer legislation, enabling them to control how products and services are displayed and traded on their sites.

### REPORT IT

As the sophistication of scams increases, the likelihood of being tricked by them also increases, especially when not paying attention or acting quickly. It is important that young people know how to report incidents as they happen. Show children how to report their concerns to the social media site, Action Fraud, banks, and other individuals or organisations linked or involved. If you are unsure of the most effective reporting channel, contact Action Fraud.

### Meet Our Expert

Gary Henderson is the Director of IT at Millfield, a large independent boarding school in Somerset, as well as a member of the Digital Futures Group, Vice Chair of the ISC Digital Advisory Group and an Association of Network Managers in Education (ANME) Ambassador.
